So what is it about brain neurons and connections?

During normal fetal development neurons are created and connect to form the various parts of the brain. (Perry 2002) These neurons specialize in governing certain parts of the body in response to chemical signals. Brain development is the process of creating, strengthening and discarding connections between neurons. At its peak the Cerebral Cortex of a healthy toddler may create 2 million synapses per second. By age 2 they may have a trillion synapses. By the process of pruning synapses are eliminated. Some are strengthened by experience while others are discarded. By age 3 a baby's brain has reached 90 % of its adult size. This demonstrates the importance of experiences, interactions, and development between an infant/toddler and their providers. If the synapses are not used they are lost. However, new synapses may be created with experiences and learning. When you are working with children with attachment disorders you really are rewiring their brains to create positive connections.

A WORD FROM Our CEO

I want to express my appreciation to those who continue to attend our mini workshops. They are both educating and educational. I find myself wishing we had all day to sit around and share information. The connection was made this time with traumatic brain injury and the similarities. I want to thank Mr. Steve for his participation. Again, any topics related to attachment disorders are open for training. It was great to see someone from CCS there as well.

Thank you

Kelly Eggleston, MS, LPC, CEO

About Alaska Attachment & Bonding Associates

AABA is a non-profit organization that provides education, training, support and advocacy for kinship, adoptive and foster families who care for children with Trauma & Stressor Related Disorders, such as Attachment Disorder and professionals who work with this population of children.

- AABA's area of Focus:** **PREVENTION** of abuse/neglect
- PLACEMENT** information
- EDUCATION** in Attachment
- COMMUNITY** resource information

WHAT drives AABA?

AABA is passionate about traumatized children.

AABA has first hand experience with Attachment Disorder children and knows the Special care and treatment needed to help these children learn, love and trust.

Left untreated, children with Attachment Disorder and other emotional disorders are often times shipped to out-of-state Residential Treatment Centers (RTC's), are likely to become emotionally disturbed adults, unemployable, and are likely to be involved in drugs, alcohol or other illegal activities.

WHY should you care?

Because this is a preventable and/or treatable disorder and will take the community working together!

"BECAUSE THIS IS YOUR HOME" !
